PROFESSIONAL SUMMARY

Senior Backend Engineer with 9+ years of experience delivering secure, scalable backend systems across government, education, healthcare, and enterprise domains. Specializes in Java, Spring Boot, PostgreSQL, distributed systems, API design, and performance optimization, with hands-on technical leadership from planning through production delivery.

CAREER HIGHLIGHTS

- Backend team lead contributing to grooming, planning, implementation guidance, and code reviews within a 30-person development team.
- Contributed to backend design and delivery across an election platform comprising nearly 25 running services.
- Helped deliver an internal election-management platform reported to support 50,000 users and approximately 100,000 daily requests during election periods.
- Reduced exam-management system response time by 30% through Redis caching and backend performance improvements.
- Supported production workflows used by 2,500+ administrators, 1,000 invigilators, and 1,000 examinees, including payments for nearly 30,000 students.
- Contributed to the National Electronic Government Procurement System, supporting enterprise workflows, data integrity, and privacy.

TECHNICAL SKILLS

Languages: Java, SQL, C#
Backend: Spring Boot, Hibernate, REST APIs, RabbitMQ, Microservices, Backend Architecture
Data & Performance: PostgreSQL, SQL Server, Redis, Database Modeling, Query Optimization
Security & Platform: Keycloak, Authentication, Authorization, Kubernetes, Data Integrity
Delivery: AI-assisted agentic coding (OpenAI Codex, Claude), CI/CD, GitHub Actions, Jenkins, Nginx, Locust, Agile Development, Requirements Analysis, Deployment, Code Review, Mentoring

PROFESSIONAL EXPERIENCE

Penta Global Ltd. | Dhaka, Bangladesh
Senior Software Engineer | August 2023 – Present

- Lead backend engineering activities for an Election Management System, including task allocation, grooming, planning, implementation guidance, and code reviews within a 30-person development team.
- Design service interactions and REST API contracts across a microservices architecture of nearly 25 services, delivering secure, scalable Java and Spring Boot services.
- Contribute to delivery of an internal system reported to support 50,000 users, alongside a public-facing application that does not require authentication.
- Implemented application-level routing of center and polling-personnel search reads to PostgreSQL read replicas, improving search responsiveness and reducing load on the primary transactional database.
- Configured SonarQube quality gates and Trivy dependency-vulnerability scanning in CI/CD, identifying and remediating critical and high-severity dependency vulnerabilities before release.

Dynamic Solution Innovators Ltd. | Dhaka, Bangladesh
Software Engineer | January 2022 – July 2023

- Led development of an exam management system using Java, Spring Boot, PostgreSQL, Flutter, and Crystal Reports; analyzed requirements and designed its database schema.
- Reduced system response time by 30% through Redis caching and backend performance improvements.
- Used Jenkins for CI/CD and Locust for load testing.
- Built a real-time administrator dashboard associated with a reported 40% increase in system usage.
- Deployed a production system used by 2,500+ administrators, 1,000 exam invigilators, and 1,000 examinees; supported registration and payment management for nearly 30,000 students.

Dohatec New Media | Dhaka, Bangladesh

Java Software Engineer | October 2016 – December 2021

- Implemented features and resolved defects for the National Electronic Government Procurement System while preserving data privacy and integrity.
- Contributed to large-file upload capabilities, relational data modeling, and enterprise workflow features.

Jaliks Soft IT Limited | Khulna, Bangladesh

.NET Developer | February 2016 – June 2016

- Implemented features and resolved defects for a large-scale education application using ASP.NET, C#, and SQL Server.

PERSONAL PROJECTS

Open-Care | Java, Spring Boot, PostgreSQL, Next.js

- Lead contributor to an open-source healthcare-information platform; built a documented Spring Boot REST API with Redis, Keycloak authorization, MinIO, Liquibase, and Docker.

FactLens | Next.js, Strapi, PostgreSQL, Cloudflare

- Built and deployed the full-stack editorial platform, including the frontend, Strapi backend and content APIs, PostgreSQL database, and Cloudflare file storage.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science and Engineering | Khulna University | 2011–2016
