PROFESSIONAL SUMMARY

Senior Backend Engineer with 9+ years of experience designing secure, scalable backend platforms across government, healthcare, education, and enterprise domains. Specialized in Java, Spring Boot, PostgreSQL, distributed systems, REST APIs, backend architecture, and performance optimization.

Experienced leading backend engineering work, designing security- and data-integrity-sensitive systems, and delivering software supporting thousands of users. Brings hands-on ownership from requirements and architecture through deployment and long-term maintenance.

CAREER HIGHLIGHTS

- 9+ years of backend engineering experience across government, healthcare, education, and enterprise domains.
- Led backend delivery activities, including task allocation, planning, implementation guidance, and code reviews, within a 30-person development team.
- Helped deliver an election-management platform supporting 50,000 users and approximately 100,000 daily requests during election periods.
- Designed and delivered services across a microservices architecture of nearly 25 running services.
- Reduced exam-management system response time by 30% through Redis caching and backend performance improvements.
- Co-authored two peer-reviewed research publications.

CORE SKILLS

Category | Skills

Languages | Java, SQL, C#

Backend | Spring Boot, Hibernate, REST APIs, Node.js, Express, PDF generation

Architecture | Microservices, distributed systems, backend architecture, API design, database modeling

Data & Performance | PostgreSQL, SQL Server, Redis, Flyway, query optimization, relational database design

Security | Keycloak, JWT token introspection, role-based authorization, data privacy, data integrity

Infrastructure | Docker, Kubernetes, deployment troubleshooting

Leadership & Delivery | Technical leadership, mentoring, grooming, planning, code reviews, stakeholder collaboration, Agile development

EXPERIENCE

Penta Global Ltd. - Senior Software Engineer

Dhaka, Bangladesh | August 2023 - Present

- Led backend engineering activities for an Election Management System, including task allocation, grooming, planning, implementation guidance, and code reviews within a 30-person development team.
- Key technologies: Java, Spring Boot, Hibernate, REST APIs, Docker, Kubernetes, Keycloak.
- Led backend delivery for candidate review, nomination lifecycle, verification, status-transition, and payment-linked submission workflows handling sensitive identity, disclosure, and election data.
- Designed service interactions, REST API contracts, and reporting workflows across a microservices architecture of nearly 25 services; owned a reporting service that consolidated data to generate official nomination, candidate, schedule, and result PDF reports.
- Help deliver an internal system supporting 50,000 users and approximately 100,000 daily requests during election periods, compared with approximately 10,000 requests per day before elections.
- Contributed to approximately 30 deployments by writing Dockerfiles and diagnosing deployment failures in the organization's self-managed Kubernetes data center.
- Digitized result-center, voter, candidate, and percentage-calculation workflows for approximately 300 returning officers; strengthened validation and role-based controls to prevent unwanted data changes.

Dynamic Solution Innovators Ltd. - Software Engineer

Dhaka, Bangladesh | January 2022 - July 2023

- Led development of an exam management system using Java, PostgreSQL, Spring Boot, Flutter, and Crystal Reports.
- Key technologies: Java, Spring Boot, PostgreSQL, Redis, Flutter, Crystal Reports.
- Analyzed requirements and designed the database schema, creating an efficient and scalable foundation for the system.
- Developed a real-time administrator dashboard that improved data visibility and decision-making, contributing to a 40% increase in system usage and user satisfaction.
- Reduced system response time by 30% by implementing Redis caching and improving backend performance.
- Deployed a production system used by more than 2,500 administrators, 1,000 exam invigilators, and 1,000 examinees.
- Supported online registration and payment management for nearly 30,000 students, streamlining a high-volume operational workflow.

Dohatec New Media - Java Software Engineer

Dhaka, Bangladesh | October 2016 - December 2021

- Worked on the National Electronic Government Procurement System, fixing bugs, implementing features, and analyzing client requirements while preserving data privacy and integrity.
- Key technologies: Java, relational data modeling, large-file uploads, enterprise workflows.
- Contributed to electronic government procurement capabilities involving large file uploads, relational data modeling, and enterprise-grade workflow support.
- Applied iterative, agile, and incremental software engineering practices in collaboration with stakeholders, customers, and product teams.
- Helped drive an 80% increase in user engagement over a six-month period through product improvements and stakeholder-aligned delivery.
- Supported long-term software partnerships with government, non-government, and enterprise organizations.

Jaliks Soft IT Limited - .NET Developer

Khulna, Bangladesh | February 2016 - June 2016

- Implemented new features and resolved bugs in a large-scale education application using ASP.NET and C#.
- Key technologies: ASP.NET, C#, SQL Server.
- Developed and maintained SQL Server databases, including stored procedures, triggers, and views.
- Collaborated with product managers, designers, developers, and other stakeholders to support successful project delivery.
- Conducted code reviews and provided feedback to improve quality and maintainability.

SELECTED PROJECTS

Open-Care | Java, Spring Boot, PostgreSQL, Next.js

- Lead contributor to an open-source healthcare-information platform providing searchable doctor, hospital, ambulance, blood-donation, and medical-resource capabilities.
- Built and documented a Spring Boot REST API with PostgreSQL, Keycloak-based JWT authorization, MinIO file storage, Liquibase migrations, Dockerized deployment, and Swagger/OpenAPI documentation.

FactLens | Headless CMS, Custom Content Models, API Integration

- Built and deployed a production editorial platform using a headless CMS architecture with customized content models and API integration.

EDUCATION

Khulna University | Bachelor of Science (B.Sc.) in Computer Science and Engineering | 2011–2016

PUBLICATIONS

- Temporal Relation Extraction using Apriori Algorithm — ICIEV, 2016.
- An Effective Attendance Monitoring System with Fraud Prevention Technique for Educational Institutions — International Journal of Engineering and Technology, 2018.
