PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience delivering secure, scalable backend systems across government, education, healthcare, and enterprise domains. Specializes in Java, Spring Boot, PostgreSQL, distributed systems, API design, and performance optimization, with hands-on technical leadership from planning through production delivery.

CAREER HIGHLIGHTS

- Backend team lead contributing to grooming, planning, implementation guidance, and code reviews within a 30-person development team.
- Designed and delivered Java and Spring Boot services across a microservices architecture of nearly 20 running services.
- Helped deliver an internal election-management platform supporting 50,000 users alongside a public-facing application.
- Reduced exam-management system response time by 30% through Redis caching and backend performance improvements.
- Supported production workflows used by 2,500+ administrators, 1,000 invigilators, and 1,000 examinees, including payments for nearly 30,000 students.
- Contributed to the National Electronic Government Procurement System, supporting enterprise workflows, data integrity, and privacy.

TECHNICAL SKILLS

Languages: Java, SQL, C#

Backend: Spring Boot, Hibernate, REST APIs, Microservices, Backend Architecture

Data & Performance: PostgreSQL, SQL Server, Redis, Database Modeling, Query Optimization

Security & Platform: Keycloak, Authentication, Authorization, Kubernetes, Data Integrity

Delivery: Agile Development, Requirements Analysis, Deployment, Code Review, Mentoring

PROFESSIONAL EXPERIENCE

Penta Global Ltd. | Dhaka, Bangladesh

Senior Software Engineer | August 2023 – Present

- Serve as backend team lead for an Election Management System, guiding grooming, planning, implementation, and code reviews within a 30-person development team.
- Design and implement secure, scalable Java, Spring Boot, Hibernate, and REST API services across a microservices architecture of nearly 20 running services.
- Help deliver an internal system supporting 50,000 users, alongside a public-facing application that does not require authentication.
- Support deployments to the organization's self-managed data center using Kubernetes and digitized election-result workflows previously dependent on paperwork and physical result delivery.

Dynamic Solution Innovators Ltd. | Dhaka, Bangladesh

Software Engineer | January 2022 – July 2023

- Led development of an exam management system using Java, Spring Boot, PostgreSQL, Flutter, and Crystal Reports; analyzed requirements and designed its database schema.
- Reduced system response time by 30% through Redis caching and backend performance improvements.
- Built a real-time administrator dashboard that contributed to a 40% increase in system usage and user satisfaction.
- Deployed a production system used by 2,500+ administrators, 1,000 exam invigilators, and 1,000 examinees; supported registration and payment management for nearly 30,000 students.

Dohatec New Media | Dhaka, Bangladesh

Java Software Engineer | October 2016 – December 2021

- Implemented features and resolved defects for the National Electronic Government Procurement System while preserving data privacy and integrity.
- Contributed to large-file upload capabilities, relational data modeling, and enterprise workflow features; helped drive an 80% increase in user engagement over six months.

Jaliks Soft IT Limited | Khulna, Bangladesh

.NET Developer | February 2016 – June 2016

- Implemented features and resolved defects for a large-scale education application using ASP.NET, C#, and SQL Server.

EDUCATION

Bachelor of Science in Computer Science and Engineering | Khulna University | 2011 – 2016
